State Energy Program Funding Opportunity

The Utah Geological Survey (UGS) is seeking proposals from potential partners to apply for U.S. Department of Energy (DOE) funding under the State Energy Program (SEP). The solicitation contains several areas of interest to UGS that promote energy efficiency, renewable energy development, and use of alternative fuels for transportation. Successful partners are encouraged to provide a cash or in-kind match.

This notice is directed to governmental entities (i.e., state, tribal, municipalities and county governments); private-sector Clean Cities stakeholders; economic development and educational institutions; energy services companies; financial institutions; utilities; private businesses; and non-profit organizations. Partners selected through this request will be subcontractors for project implementation. UGS plans to enter into contracts with selected partners as a result of this request.

Proposals must be received at UGS, 1594 West North Temple, Suite 3110, P.O. Box 146100, Salt Lake City, Utah, 84114-6100, by April 10, 2005. Request for Proposal (RFP) forms and additional program information may be requested from Denise Beaudoin at (801) 538-4798 or dbeaudoin@utah.gov.
